

*Standards and
Assessment Guide*

Autobody Repair

Introduction

Welcome to the Standards and Assessment Guide (SAG), a comprehensive resource designed to support excellence in assessment practices for all skills competitions hosted at the WorldSkills Competition. A key component of the SAG is the commitment to continuous improvement through ongoing review, ensuring that these guides consistently reflect the latest industry innovations and high standards of assessment in an open and transparent manner.

Purpose

The primary purpose of this guide is to provide a structured framework for the consistent and fair assessment of each skill competition. It aims to ensure that all assessments are conducted with a high degree of accuracy, reliability, validity, and reflect global industry standards. By adhering to these guidelines, assessors can maintain the integrity of the competition and uphold the high standards associated with WorldSkills.

Note: this guide is not a replacement for the Marking Scheme and should only be used as a reference when required during the assessment process. Competitors are not allowed to have a copy of this SAG in the workshop in either digital or paper form.

Scope

This document covers general assessment practices applicable to a diverse range of industry sectors including:

- Manufacturing and Engineering Technology
- Information and Communication Technology
- Construction and Building Technology
- Transportation and Logistics
- Social and Personal Services
- Creative Arts and Fashion

Each skill competition has its unique requirements and benchmarks, which are detailed within sections of this guide. The consistency of assessment across each skill is the overarching principle, ensuring a unified approach to evaluating Competitor performance to the highest standards.

Key Components

The guide is structured into several key components, each addressing critical aspects of the assessment process:

Assessment Principles and Objectives

- Emphasis on fairness, transparency, and objectivity in assessments.
- Alignment with global industry standards and best practices.

Assessment Methods and Tools

- Description of various assessment methods in Measurement and Judgement.
- Guidance on the application of appropriate assessment tools and equipment (if applicable).

Criteria and Benchmarks

- Examples of assessment criteria and aspects for each skill, outlining the expected competencies and performance standards.
- Benchmarks for different levels of proficiency i.e. Judgement award range 0, 1, 2, 3 or Yes/No criteria alongside clear measurable descriptors.

Expert assessment requirements

- Completion of the Access Programme.
- Approved Curriculum Vitae (CV).
- Reaching **100%** Expert preparedness.
- Full participation of online and in-person Mandatory Assessment Training (MAT).
- Completion of practical assessment testing at the Competition.

Quality Assurance and Improvement

- Monitoring and evaluation: Ensuring assessments are carried out correctly and produce reliable results.
- Continuous improvement: Using feedback from Experts and Skill Competition Managers to enhance future assessments.
- Periodic review: Regularly updating processes to reflect current industry and WorldSkills standards.

Implementation

For effective implementation, this guide should be used for guidance purposes only and in parallel with the Technical Description for each skill. Experts are encouraged to familiarize themselves thoroughly with both the general guidelines and the particular requirements of their respective skill areas. Collaborative efforts between the Skill Management Team, Experts, and Competitors are vital for achieving the ultimate goal of global skills development.

Conclusion

The Standards and Assessment Guide embodies the commitment of the WorldSkills movement to nurturing talent and promoting the highest standards of vocational education and training worldwide. By providing clear and comprehensive guidance, we aim to empower Experts to conduct marking and assessment practices that are not only rigorous and equitable but also inspiring and transformative for all participants.

Thank you for your dedication to upholding these standards and contributing to the success of the WorldSkills Competition. Together, we can continue to champion skills excellence and celebrate the achievements of talented individuals from around the globe.

Skill 13 – Autobody Repair

Measurement

Measurement is used to assess accuracy, precision, and other performance that can be measured objectively. It is used where ambiguity must be avoided.

The total marks allocated to measurement marking may vary from competition to competition depending on the Test Project.

Aspect	WSOS section as per TD	Descriptor
Measuring bridge / ladder and clamps are correctly locked / torqued	4	Check the bolts with the help of torque wrench with specific torque 10 Nm
Measuring Points	2	Measuring point value compare with the data sheet, which prepared before the competition. The tolerance is ± 2
Pulling tower, clamp, chain and safety cable	1	All things should be on place as per damage of car
Prepare gap size for welding	4	Gap between the two panels should be 0 to 1mm
Parts cut as per instruction	1	Parts should be cut as per instruction given in TP the tolerance is ± 1
Paint stripping on panel for spot, Mig/Mag & plug welding	1	Paint stripping should be done as per instruction in TP (minimum 10mm around the weld area)

Judgement

Judgement is used to assess the quality of performance about which there may be small differences of view when applying the external benchmarks.

The Resources column in the table below may include all kinds/formats of resources such as: a link to a YouTube video, a website link, an illustration, a photo, a reference to a book, and so on. It needs to be as detailed as possible to show the differentiation between 0, 1, 2, 3.

Generic rules:

The assessment group comprises three Experts plus one Expert who acts as the supervisor. The supervising Expert will replace an Expert in the marking group to prevent compatriot marking.

The difference of the three Experts' scores may not exceed 1. If this is the situation the Experts must re-score until there is a maximum difference of 1. As long as the three Experts judge within 1, the result can be entered into the CIS.

The total marks allocated to judgement marking may vary from competition to competition depending on the Test Project.

Aspect – Equipment Setup Evo

WSOS section as per TD	Score	Descriptor	Resource
1	0	Evo is not complete setup	
	1	Incorrectly assemble the EVO Tower by 2> missing parts the boulons is not tightened, the sens of traction is opposite.	

WSOS section as per TD	Score	Descriptor	Resource
	2	Incorrectly assemble the EVO Tower by 1 missing parts The boulons are tightened but the tower screw is so long and not in good position to tract.	

WSOS section as per TD	Score	Descriptor	Resource
	3	Correctly assemble the EVO Tower at the correct measuring point with the vehicle part still intact. The instruction was correctly followed to construct the EVO Tower The boulons are tightened, the evo is a good position to tract and screw tower is short.	

Aspect – Panel Repair

WSOS section as per TD	Score	Descriptor	Resource
1	0	Damaged area has been partially restored to original shape but still has deformation with many highs and/or low areas still needing correction, or has not been started at all	
	1	Repaired area looks to have the general original contour and shape but still has minor deformation, thinned metal, a few deep gouges, and/or has a course finish still visible and would need filler material to be sent to the paint department	

WSOS section as per TD	Score	Descriptor	Resource
	2	Repaired area looks to have the original contour and shape with no high spots but still has minor deformation, and/or has a course finish and would need a minimal amount of filler material to be painted	
	3	Repaired area looks to be returned to original contour and shape, is smooth, has no evident high spots, loss of metal thickness, gouges, burrs, scratches, not sanded to P120g or finer. and is ready for chemical treatment and primer
